

With their self-titled album, Achtung Spitfire Schnell Schnell are delivering a Grade-A Garage-Punk record as it is meant to be – wild, in the red, danceable, no frills.

Yet what makes it grow with every listen are the many influences that show in all the details and quotes in this surprisingly complex production. You find sixties Soul meet Postpunk, Alternative meet Beat and sophisticated Indie meet raw Rock'n Roll.

What makes this an absolute Must-have for every music-lover is the artwork and the design. More devotion and love for the detail is hardly possible – this is the Vinyl album as an art like it seemed forgotten in the times of MP3. There are heaps of things to touch, look at, read – beautifully printed cover, coloured heavy vinyl, Member-Card. Last not least the booklet – designed in the style of classic comicbooks you have 32 pages full to the brim with lyrics, pictures, posterdesigns and as the cream of it a graphic novel of one of the song-lyrics. The first 100 come with an extra free 2005 vinyl single, too.

Every little bit of this record was made by the band or their direct environment – this is a true DIY-masterpiece that everyone caring for Rock'n Roll, Vinyl and Indie-art should have. **There are only 300 – then they're gone.**
